\$58,547,000

Does this solve the problem: \$47,832,900 would be the reduction to municipal entitlements, and \$10,714,100 would be the reduction to county entitlements – and then each one can be converted to a tax rate based on total statewide equalized value, but the municipal amount/rate would be applied to the municipal equalized values, and then county amount/rate to the county values?

Hi Sara,

The dollar amount reduction cannot work exactly like the 1 percent deduction created in P5 because the percentage reduction is applied twice: once to the moneys distributed to counties and again to the moneys distributed to counties. Under the dollar amount reduction, would I reduce the entire amount distributed to counties and municipalities? If so, I don't think the redistribution by equalized value works, because the counties value will incorporate the value of the municipalities. I think. Your thoughts?

Hi Joe – I know you're swamped with budget repair bill stuff, so I thought I'd just drop an email regarding the changes for this draft (per my voicemail).

In addition to doing this as a \$ reduction rather than a percentage, we also are planning to make this a permanent reduction. I think all we would need to do is eliminate the change in Section 1. Because we have Section 5, I think the permanent reduction is accomplished. If you have any other thoughts or concerns, let me know. Thanks!

Hi Joe – given the other changes we are making, the county and municipal aid account number now should be \$846,156,200, rather than the \$803M.

SHARED REVENUE

In 2011, and in each subsequent year, the amount of the county and municipal aid payment that each county and municipality receives is the same as the amount received in 2010.
